Hey, we're Nicola & Tolu! When we graduated our mission was to find a way to have fun, party and make lots of money. Back in 2021, when clubbing was still forbidden, we found ourselves often hosting games nights. After the success of a few, we started to get creative by adding our own twist to games and even creating our own! One night we had ordered a few games and noticed that they were either basic, poorly written or low quality but we still had a blast and that's when the penny dropped - "we need to make our own games!". Since then, we've set out to make the perfect entertainment games, where every card is well thought-out, super fun and would add a little drama to your night - that's how Berserk Games was born!

about us.
